OTHER CONSIDERATIONS

There may be times when you only need to receive and submit a Certificate of Completion as proof of training completion for re-certification. We've got you covered!

If you don't see your credentials listed in this Guide, consider submitting your Certificate of Completion to your employer or Certification Board for credit. Additional information may be required, such as the course description and learning objectives., which are available on the Portal.

01

Pennsylvania Certification Board (PCB)

The PCB is dedicated to public protection by establishing and monitoring certification standards and examination development for professionals in the behavioral, physical, and community health fields in addition to providing management and consultation services.

The PCB no longer reviews or approves education/training in order to offer credits. Instead, PCB-certified professionals can take relevant trainings from any source they choose and use them toward re-certification.
